PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) | Client: Travelport, LP
Chennai, India

Jun 2015 – Present

Technical Lead / Associate Consultant — Application Development

Jan 2020 – Present

- Design and develop enterprise backend applications using Java and Spring Boot for Travelport platform services.
- Build and integrate SOAP web services using XML across platform and vendor systems, and test them using SOAP UI.
- Write and optimize SQL queries for data access, reporting, troubleshooting and application support.
- Automate builds with Maven and support CI/CD pipelines using Jenkins, GitHub and GitHub Actions.
- Serve as Scrum Master within the Agile Release Train, with daily customer interaction.
- Track work in JIRA across Agile Scrum, Waterfall and SAFe models, and support code reviews, production support and team coordination.

System Engineer — Maintenance & Production Support

Sep 2015 – Dec 2020

- Delivered maintenance and production support for the Travelport airline platform, resolving problem tickets.
- Built strong domain knowledge in re-pricing of airline tickets.
- Reduced backlog tickets by 80% through improved triage and productivity.
- Performed QA testing to help the team achieve 100% business value.

Initial Learning Program (ILP) — TCS Training

Jun 2015 – Aug 2015

- Completed foundational training in Java, JavaScript, SQL, Spring and Hibernate.

KEY PROJECTS — TCS / TRAVELPORT

Universal API (UAPI) | AD and MPS streams | 4+ years

- Backend services and integrations supporting API-based travel platform communication.

Pricing Platform Services | AD 2 years, MPS 1 year | 3 years

- Pricing backend services, SQL troubleshooting, service testing and application support.

Rapid Reprice | MPS 3 years, AD 1 year | 4 years

- Reprice workflows, integration testing, defect analysis and release support.

PERSONAL PROJECTS — AI-ASSISTED WEB DEVELOPMENT

Independently designed and built full-stack web applications using AI-assisted, agentic development tools — Google Antigravity (Agentic IDE), Claude Desktop and OpenAI Codex.

Fusion Elevators & Escalators | Corporate Website

- Responsive marketing website presenting the company's elevator and escalator products and services.
- Includes dedicated product / service pages and a contact-and-enquiry section for prospective customers.

Route54 Restaurant | E-Commerce Web Application

- Full-stack online food-ordering application with menu browsing, shopping cart and checkout.
- Supports the complete ordering journey, from browsing the menu to placing an order.

Personal Finance Tracker | Web Application

- Self-use web application to record income and expenses and manage personal budgets.
- Presents category-wise summaries and dashboards to track spending and savings over time.
